RE: *Lorraine L. Cerimele v. Lexington Precision Corporation, et al.*
Trumbull County Court of Common Pleas, Case No. 00-CV-1997

ATTY. FRANK BODOR

Dear Mr. Bodor:

Enclosed are two CD-ROMs containing over 22,500 pages of documents (the equivalent of eight bankers' boxes) in response to Plaintiff's Request for Production of Documents. We have reviewed these documents for privilege and have attempted to tie these documents to your client's Requests. While we have attempted to review all of the documents for privilege, it is possible that some privileged documents may still be inadvertently produced. To the extent any privileged documents are inadvertently produced, we reserve the our right to preserve any privilege attached to these documents. This specifically applies, but is not limited to, any "controlled" documents.

In addition, we have noticed some duplication in the documents produced. We suspect this is because these documents were culled from departments with overlapping functions and recordkeeping.

Finally, we are in possession of a DVD-ROM containing electronic versions of various work instructions, inspection instructions, mold reports, audit reports, PPAP's, process reports, SPC documents, and other materials. These computer files still need to be reviewed for privileged information and to determine the specific Requests to which they are responsive. This DVD-ROM contains approximately 3,200 files and nearly 114,000 pages to review. We will provide those to you as soon as we have reviewed them, but given the number of files and pages, our review may last into October. The most time consuming part of this process will be to determine the specific Requests to which the files are responsive. We can produce these documents sooner if there is no need to tie these electronic files to the Requests. Please let us know your preference.

Below is a summary of the documents produced:

1. Documents LEX000001-LEX000150 are documents related to Direct Ship and are generally responsive to Request for Production No. 1. Documents in the LEX000044-LEX000086 range may also relate to Request No. 7 (cure time reduction).
